

Dilaver Şahin

I am a final year student of Forensic Informatics Engineering at Firat University. Cyber security is a field I enjoy exploring. I am constantly learning new things, improving myself and I am very happy to share what I have learned on this journey with others. I take trainings to analyze security threats, take exams and improve myself more and more every day. I love both learning and benefiting from what I have learned. I am prone to teamwork, I have a very good speed to learn new things I I don't know and adapt, so I don't have problems in this situations.

Work Experience

Network and Computer Systems Security Technician, Internet Bilgisayar Sistemleri - Logo yazılım (Internship), Elazığ, Türkiye

January 2022 - February 2022

Even in my first year at university, working in the field gave me valuable workplace experience. While learning server management in class, I gained hands-on skills configuring servers, switches, and setting up Berqnet firewalls. I also worked on resolving errors for companies like Finall Cours, providing practical experience in troubleshooting and fieldwork challenges.

System and Network Specialist Intern, TeknoDC Bilişim Teknolojileri A.Ş (Internship), Tubitak Marmara Teknokent Gebze, Kocaeli, Türkiye

July 2024 - September 2024

During my time in the data center, I gained hands-on experience in network infrastructure, server management, and automation. I developed and optimized scripts, primarily using Python and PowerShell, to automate routine tasks such as server monitoring and network configuration. I also developed my understanding of network protocols and policies, including VLANs, subnets, and firewall configurations. This experience strengthened my ability to efficiently manage large-scale systems and solve detailed technical problems in a continuous work environment.

Volunteering

Vice President, Firat University Cyver Security Community

December 2021 - September 2022

I served as vice president for about a year. I have been in trainings, I have given training at the same time. it was a fun and fast time for me it gave me a lot of experience
